

Section 1194.22 Web-based Internet information and applications – Detail Voluntary Product Accessibility Template (VPAT)

Product Tested: LexisNexis® Academic

Date Tested: May 23, 2014

Software: Google Chrome 34.0.1847.137 (w/ Chromevox extension), Mozilla Firefox 28.0

Test Conducted By: Brandon Florkey, Software Engineer

VPAT Created By: Brandon Florkey, Software Engineer

Criteria	Supporting Features	Remarks and explanations
(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	Not currently supported.	Text equivalents are not present for the product title (LexisNexis® Academic) and the date calendar icons.
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	N/A	No multimedia presentations are present in the product.
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	Supported.	Information is not conveyed only with color.
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	Supported.	The product can be read without a style sheet.
(e) Redundant text links shall be provided for each active region of a server-side image map.	N/A	No image maps are present in the product.
(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	N/A	No image maps are present in the product.
(g) Row and column headers shall be identified for data tables.	N/A	No data tables are present in the product.
(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	N/A	No data tables are present in the product.
(i) Frames shall be titled with text that facilitates frame identification and navigation	Not currently supported.	A title is not present for the iframe on the product.
(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	Supported.	No elements are present in the product that would cause the screen to flicker.
(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.	N/A	The interface will be accessible after revisions so a text-only page will not be necessary.
(l) When pages utilize scripting languages to display content, or to create interface	Not currently supported.	The interface elements that are hidden initially

elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.		and accessed via JavaScript when elements are clicked are currently not read by a screen reader or accessible via the keyboard.
(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).	N/A	No plug-ins or applets are required for the product.
(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Partially supported.	The main parts of the form (the search box and search button) are read by the screen reader and the form can be filled out and submitted via a keyboard. However, the advanced options section is not accessible.
(o) A method shall be provided that permits users to skip repetitive navigation links.	Not currently supported.	The tools links should have a skip link so they are not read every time before reaching the form.
(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	N/A	No timed responses are present in the product.

Section 1194.31 Functional Performance Criteria – Detail Voluntary Product Accessibility Template (VPAT)

Criteria	Supporting Features	Remarks and explanations
(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.	Not currently supported.	Revisions are required to make the site function better in a screen reader and by keyboard.
(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided.	Partially supported. Parts of the product (including the main form elements) support screen readers.	Additional changes need made to make the site fully function via a screen reader and keyboard.
(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided	Supported	The site does not require the user to hear any information. All information is available visually. There are no audio or video files that would require text-equivalents.

(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.	N/A	The site does not require the user to hear any information. All information is available visually.
(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.	Supported	Speech is not required to use the product.
(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.	Supported	Use of the product does not require fine motor control.

**Section 1194.41 Information, Documentation and Support – Detail
Voluntary Product Accessibility Template (VPAT)**

Criteria	Supporting Features	Remarks and explanations
(a) Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge.	Supported	
(b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.	Supported	
(c) Support services for products shall accommodate the communication needs of end-users with disabilities.	Supported
